

EPA Funded Reusable Takeout Container Pilot Project

Reusable takeout container programs offer workplace cafeteria customers the choice to take their food to-go in durable products instead of in single-use products.

This project can help you:

- ▶ **Reduce waste**
- ▶ **Decrease costs**
- ▶ **Engage employees**
- ▶ **Promote your sustainability efforts**
- ▶ **Collect valuable data**

We are evaluating New York City workplace cafeterias to partner with for an EPA funded pilot program. The selected partner will receive:

- ▶ Planning, design, implementation, and ongoing management
- ▶ App-based tracking system
- ▶ Digital reporting
- ▶ Waste audits

**The pilot site will be selected by March 2019.
Contact us now to find out if your cafeteria qualifies.**
